Examiner

Jeffrey D. Popham

Applicant(s)

CAMBRIDGE ET AL.

Art Unit

2137

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 4/1/2005.
2. ☒ The allowed claim(s) is/are 1,5-10,13,14,58-62 and 64-68.
3. ☒ The drawings filed on 26 July 2001 are accepted by the Examiner.
4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☐ All b) ☐ Some* c) ☐ None of the:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

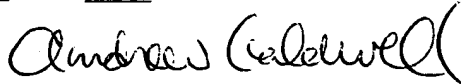

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
 6. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
7. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☐ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/08),
Paper No./Mail Date _____
4. ☐ Examiner's Comment Regarding Requirement for Deposit
of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☒ Interview Summary (PTO-413),
Paper No./Mail Date 20050628-Attached
7. ☒ Examiner's Amendment/Comment
8. ☐ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Zilka on 6/28/2005.

Please amend the claims as follows:

IN THE CLAIMS:

Amended claims follow:

1. (Currently Amended) A computer-implemented method for responding to a virus alert, the virus alert containing information pertaining to a new virus, the method comprising:

receiving the virus alert;

assessing a risk level associated with the new virus, the assessing including:
obtaining information associated with at least one previous virus which has caused a previous infection on a computer system, and comparing the information pertaining to the new virus with the information associated with the previous virus which has caused the previous infection on the computer system; and

obtaining a program code based on the risk level;

wherein the previous virus and the new virus are of a first type, and the information associated with the previous virus which has caused the previous infection on the computer system includes data associated with a duration of the previous infection and a scope of the previous infection.

2.-4. (Cancelled)

5. (Previously Presented) The method as recited in claim 1 wherein the information associated with the previous virus which has caused the previous infection on the

Art Unit: 2137

computer system is stored in a profile on a database associated with the computer system.

6. (Original) The method as recited in claim 1 wherein the virus alert is received from an anti-virus information source.

7. (Original) The method as recited in claim 6 wherein the virus alert is automatically received from the anti-virus information source.

8. (Original) The method as recited in claim 7 wherein receiving the virus alert includes acquiring the virus alert from the anti-virus information source.

9. (Original) The method as recited in claim 1 wherein the computer system is a computer network, the computer network including a plurality of computing devices.

10. (Previously Presented) A computer program product responding to a virus alert, the virus alert being arranged to provide information pertaining to a new virus, the computer program product comprising:

computer code for receiving the virus alert;

computer code for assessing a risk level associated with the new virus, the assessing including: obtaining information associated with at least one previous virus which has caused a previous infection on a computer system, and comparing the

Art Unit: 2137

information pertaining to the new virus with the information associated with the previous virus which has caused the previous infection on the computer system;

computer code for obtaining program code based on the risk level; and

a computer-readable medium that stores the computer codes;

wherein the previous virus and the new virus are of a first type, and the information associated with the previous virus which has caused the previous infection on the computer system includes data associated with a duration of the previous infection and a scope of the previous infection.

11. (Cancelled)

12. (Cancelled)

13. (Previously Presented) The computer program product as recited in claim 10 wherein the computer-readable medium is one selected from the group consisting of a hard disk, a CD-ROM, a DVD, a computer disk, a tape drive, and a computer memory.

14. (Previously Presented) A computer system suitable for responding to a virus alert, the virus alert being providing information pertaining to a new virus, the computer system comprising:

computer code for receiving the virus alert;

computer code for assessing a risk level associated with the new virus, the assessing including: obtaining information associated with at least one previous virus which has caused a previous infection on the computer system, and comparing the information pertaining to the new virus with the information associated with the previous virus which has caused the previous infection on the computer system;

computer code for obtaining code based on the risk level;

a computer-readable medium that stores the computer codes; and

a processor that executes the computer codes;

wherein the previous virus and the new virus are of a first type, and the information associated with the previous virus which has caused the previous infection on the computer system includes data associated with a duration of the previous infection and a scope of the previous infection.

15.-57. (Cancelled)

58. (Previously Presented) The computer program product as recited in claim 10 wherein the information associated with the previous virus which has caused the previous infection on the computer system is stored in a profile on a database associated with the computer system.

59. (Previously Presented) The computer program product as recited in claim 10 wherein the virus alert is received from an anti-virus information source.

60. (Previously Presented) The computer program product as recited in claim 59 wherein the virus alert is automatically received from the anti-virus information source.

61. (Previously Presented) The computer program product as recited in claim 60 wherein receiving the virus alert includes acquiring the virus alert from the anti-virus information source.

62. (Previously Presented) The computer program product as recited in claim 10 wherein the computer system is a computer network, the computer network including a plurality of computing devices.

63. (Cancelled)

64. (Previously Presented) The computer system as recited in claim 14 wherein the information associated with the previous virus which has caused the previous infection on the computer system is stored in a profile on a database associated with the computer system.

65. (Previously Presented) The computer system as recited in claim 14 wherein the virus alert is received from an anti-virus information source.

Art Unit: 2137

66. (Previously Presented) The computer system as recited in claim 65 wherein the virus alert is automatically received from the anti-virus information source.

67. (Previously Presented) The computer system as recited in claim 66 wherein receiving the virus alert includes acquiring the virus alert from the anti-virus information source.

68. (Previously Presented) The computer system as recited in claim 14 wherein the computer system is a computer network, the computer network including a plurality of computing devices.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Popham whose telephone number is (571)-272-7215. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Caldwell can be reached on (571)-272-3868. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
